Gundry, the companion cookbook to New York Times bestselling *The Plant Paradox*, offering 100 easy-to-follow recipes and four-color photos. In the New York Times bestseller *The Plant Paradox*, Dr. Steven Gundry introduced readers to the hidden toxins lurking in seemingly healthy foods like tomatoes, zucchini, quinoa, and brown rice: a class of plant-based proteins called lectins. Many people are familiar with one of the most predominant lectins—a substance called gluten, which is found in wheat and other grains. But while cutting out the bread and going gluten-free is relatively straightforward, going lectin-free is no small task. Now, in *The Plant Paradox Cookbook*, Dr. Gundry breaks down lectin-free eating step by step and shares one hundred of his favorite healthy recipes. Dr. Gundry will offer an overview of his *Plant Paradox* program and show readers how to overhaul their pantries and shopping lists to make delicious, simple, seasonal, lectin-free meals. He'll also share his hacks for making high-lectin foods safe to eat, including methods like pressure-cooking grains and peeling and deseeding tomatoes. With a quick-start

program designed to boost weight loss and recipes for smoothies, breakfasts, main meals, snacks, and desserts, *The Plant Paradox Cookbook* will show readers of *The Plant Paradox*—and more—how delicious it can be to eat lectin-free.

The Oh She Glows Cookbook Angela Liddon 2014-03-04 The New York Times bestseller from the founder of *Oh She Glows* "Angela Liddon knows that great cooks depend on fresh ingredients. You'll crave every recipe in this awesome cookbook!" —Isa Chandra Moskowitz, author of *Isa Does It* "So many things I want to make! This is a book you'll want on the shelf." —Sara Forte, author of *The Sprouted Kitchen* A self-trained chef and food photographer, Angela Liddon has spent years perfecting the art of plant-based cooking, creating inventive and delicious recipes that have brought her devoted fans from all over the world. After struggling with an eating disorder for a decade, Angela vowed to change her diet — and her life — once and for all. She traded the low-calorie, processed food she'd been living on for whole, nutrient-packed vegetables, fruits, nuts, whole grains, and more. The result? Her energy soared, she healed her relationship with food, and she got her glow back, both inside and out. Eager to share her realization that the food we put into our bodies has a huge impact on how we look and feel each day, Angela started a blog, *ohsheglows.com*, which is now an Internet sensation and one of the most popular vegan recipe blogs on the web. Whether you are a vegan, "vegan-curious," or you simply want to eat delicious food that just happens to be healthy, too, this cookbook is a must-have for anyone who longs to eat well, feel great, and simply glow! **The Bulletproof Diet** Dave Asprey 2014-12-02 In his mid-twenties, Dave Asprey was a successful Silicon Valley multimillionaire. He also weighed 300 pounds, despite the fact that he was doing what doctors recommended: eating 1,800 calories a day and working out 90 minutes a day, six times a week. When his excess fat started causing brain fog and food cravings sapped his energy and willpower, Asprey turned to the same hacking techniques that made his fortune to "hack" his own biology, investing more than \$300,000 and 15 years to uncover what was hindering his energy, performance, appearance, and happiness. From private brain EEG facilities to remote monasteries in Tibet, through radioactive brain scans, blood chemistry work, nervous system testing, and more, he explored traditional and alternative technologies to reach his physical and mental prime. The result? The Bulletproof Diet, an anti-inflammatory program for hunger-free, rapid weight loss and peak performance. The Bulletproof Diet will challenge—and change—the way you think about weight loss and wellness. You will skip breakfast, stop counting calories, eat high levels of healthy saturated fat, work out and sleep less, and add smart supplements. In doing so, you'll gain energy, build lean muscle, and watch the pounds melt off. By ditching traditional "diet" thinking, Asprey went from being overweight and sick in his twenties to maintaining a 100-pound weight loss, increasing his IQ, and feeling better than ever in his forties. The Bulletproof Diet is your blueprint to a better life.

The Pegan Diet Dr. Mark Hyman 2021-02-23 Twelve-time New York Times bestselling author Mark Hyman, MD, presents his unique Pegan diet—including meal plans, recipes, and shopping lists. For decades, the diet wars have pitted advocates for the low-carb, high-fat paleo diet against advocates of the exclusively plant-based vegan diet and dozens of other diets leaving most of us bewildered and confused. For those of us on the sidelines, trying to figure out which approach is best has been nearly impossible—both extreme diets have unique benefits and drawbacks. But how can it be, we've asked desperately, that our only options are bacon and butter three times a day or endless kale salads? How do we eat to reverse disease, optimal health, longevity and performance. How do we eat to reverse climate change? There must be a better way! Fortunately, there is. With The Pegan Diet's food-is-medicine approach, Mark Hyman explains how to take the best aspects of the paleo diet (good fats, limited refined carbs, limited sugar) and combine them with the vegan diet (lots and lots of fresh, healthy veggies) to create a delicious diet that is not only good for your brain and your body, but also good for the planet. Featuring thirty recipes and plenty of infographics illustrating the concepts, The Pegan Diet offers a balanced and easy-to-follow approach to eating that will help you get, and stay, fit, healthy, focused, and happy—for life.

In Defense of Food Michael Pollan 2008-01-01 #1 New York Times Bestseller from the author of How to Change Your Mind, The Omnivore's

Dilemma, and Food Rules Food. There's plenty of it around, and we all love to eat it. So why should anyone need to defend it? Because in the so-called Western diet, food has been replaced by nutrients, and common sense by confusion--most of what we're consuming today is longer the product of nature but of food science. The result is what Michael Pollan calls the American Paradox: The more we worry about nutrition, the less healthy we see to become. With In Defense of Food, Pollan proposes a new (and very old) answer to the question of what we should eat that comes down to seven simple but liberating words: "Eat food. Not too much. Mostly plants." Pollan's bracing and eloquent manifesto shows us how we can start making thoughtful food choices that will enrich our lives, enlarge our sense of what it means to be healthy, and bring pleasure back to eating.
