Update: Laboratory Exercises in Anatomy and Physiology with Cat Dissections Robert Amitrano 2012-01-14
Known for its clear descriptions and art program, this lab manual examines every structure and function of the human body. It features dissection of the cat, numerous physiological experiments, and an emphasis on the study of anatomy through histology. In addition to a large variety of illustrations, helpful learning support includes lists of appropriate terms accompanying art, numerous photomicrographs and specimen photos,

phonetic pronunciations and derivations of terms, diagrams of lab equipment, and lab report questions and report templates. An instructor's guide is available and provides detailed information for instructors about needed materials, suggestions, and answers to questions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

originally published in 1967 and now in its 12th printing, has been used in countless laboratories as a guide to dissection and supplement to introductory textbooks. Outline of Cat Anatomy is an abridged version of the original guide, modified for practical use in one-semester courses. It employs anatomical terms used in human rather than veterinary anatomy and includes illustrations of human anatomy that may be compared with those of the cat, especially useful for the many students who do not have access to human dissections. Gilbert's earlier Pictorial Anatomy of the Cat is "an excellent, well-illustrated dissection guide for use in courses in comparative anatomy. The text is informative and accurate, and instructions for

dissection are clear and helpful.... Highly recommended." □Choice

Photo Manual and Dissection Guide of the Cat Fred Bohensky
2001-01-01 The Bohensky Dissection Series has been used successfully by more than 300,000 biology students nationwide. Each book in the series is designed to guide the student through the study of anatomical structures. The books do this through the use of clearly marked photographs and illustrations. Accompanying text offers the student both easy-to-follow dissection instructions

information about the section under observation. At the end of each chapter there are tests which can be used for self-study or for grade course evaluation. Within the traditional dissection portion of a biology course, many programs include the sheep heart, eye, and brain. Within many of these guides, the author has incorporated photographs of these structures to more closely follow standard course curriculum. The author also provides important information on human organs such as the eye, ear, and heart. In this way, the student can better understand the role and function of these organs as they relate to human life processes. Add to this each book's large-size format, lay-flat spiral binding, and reasonable cost, and you can see

why the Bohensky Dissection Series has become one of the most successful dissection guides used throughout this country's schools.

Pictorial Anatomy of the Cat 1976-01-01 The cat has been used as a subject for dissection in the study of mammalian anatomy for almost two centuries. The very popular Pictorial Anatomy of the Cat, by Stephen Gilbert, originally published in 1968 and now its twelfth printing has been used in countless laboratories as a guide to dissection and supplement to introductory textbooks.

Cat Dissection Connie Allen 2005-08-05 This laboratory guide directs students through a series of dissection activities for use in the lab accompanied by full color photos and figures.

follow writing style, and reader-focused features to make this the most reader-friendly Human Anatomy Lab Manual on the market. These features help readers to retain concepts and terms that they learned in class and then directly apply that knowledge to their work in the laboratory. This lab manual can be used with any human anatomy book available. Key Topics: Introduction to the Human Body, Use of the Microscope, The Cell and Cell Division, Tissues, The Integumentary System, Organization of the Skeletal System, The Axial Skeleton, The Appendicular Skeleton, Articulations, Organization of Skeletal Muscles, Axial Muscles, Appendicular Muscles, Organization of the Nervous System, The Spinal Cord and Spinal Nerves, The Brain and

Cranial Nerves, General Senses, Special Senses: Olfaction and Gustation, Special Senses: The Eye, Special Senses: The Ear, The Endocrine System, The Blood, The Heart, The Lymphatic System, The Respiratory System, The Digestive System, The Urinary System, The Reproductive System, Human Development, Surface Anatomy, Cat Nervous System, Cat Endocrine System, Cat Vascular System, Cat Lymphatic System, Cat Respiratory System, Cat Digestive System, Cat Urinary System, Cat Reproductive System

Market: Intended for those interested in learning the basics of human anatomy
