As scholarship has continued to evolve, this revised and expanded second edition offers indispensable meditations on new and developing concepts used in American studies, cultural studies,

and beyond. It is equally useful for college students who are trying to understand what their teachers are talking about, for general readers who want to know what's new in scholarly research, and for professors who just want to keep up. Designed as a print-digital hybrid publication, Keywords collects more than 90 essays—30 of which are new to this edition—from interdisciplinary scholars, each on a single term such as “America,” “culture,” “law,” and “religion.” Alongside “community,” “prison,” “queer,” “region,” and many others, these words are the nodal points in many of today's most dynamic and vexed discussions of political and social life, both inside and outside of the academy. The Keywords website, which features 33 essays, provides pedagogical tools that engage the entirety of the book, both in print and online. The publication brings together essays by scholars working in literary studies and political economy, cultural anthropology and ethnic studies, African American history and performance studies, gender studies and political theory. Some entries are explicitly argumentative; others are more descriptive. All are clear, challenging, and critically engaged. As a whole, Keywords for American Cultural Studies provides an accessible A to Z survey of prevailing academic buzzwords and a flexible tool for carving out new areas of inquiry. Experimental Techniques in Plant Disease Epidemiology

Jürgen Kranz 2012-12-06 Most books on epidemiology have treated the subject from a statistical, mathematical or computer applicational point of view. However, experiments must be performed first to provide the data for models which in turn can then be proven by further experimentation. This mutual interplay of theory and empirics gives epidemiology its scientific thrust and charm. This book provides a choice of methods for varying applications and objectives, covering all important aspects for the designing of experiments. Furthermore, the reader is supplied with solutions to his experimental problems and many "tricks of the trade". The newcomer to the field will also profit by this methodology guide.

English Anna Wierzbicka 2006-04-27 It is widely accepted that English is the first truly global language and lingua franca. Anna Wierzbicka, the distinguished linguist known for her theories of semantics, has written the first book that connects the English language with what she terms "Anglo" culture. Wierzbicka points out that language and culture are not just interconnected, but inseparable. She uses original research to investigate the "universe of meaning" within the English language (both grammar and vocabulary) and places it in historical and geographical perspective. This engrossing and fascinating work of scholarship should appeal not only to linguists and others concerned with language and culture, but the large group of scholars studying English and English as a second language.

Experience, Evidence, and Sense Anna Wierzbicka 2010 "Focusing on a handful of English words whose meaning seems obvious to native speakers, and using a brand of semantic analysis accessible to any intelligent lay person, Anna Wierzbicka reveals the empiricist worldview embedded in the English lexicon and shows how mystify-ingly foreign English can thus be to foreigners. As an exploration in historical semantics, Wierzbicka's new book deserves a place beside Raymond Williams's *Keywords*."---J. M. Coetzee, University of Adelaide, Nobel Laureate in Literature --

The Oxford Handbook of Christology Francesca Aran Murphy 2015 The Oxford Handbook of Christology brings together 40 authoritative essays considering the theological study of the nature and role of Jesus Christ. This collection offers dynamic perspectives within the study of Christology and provides rigorous discussion of inter-confessional theology, which would not have been possible even 60 years ago. The first of the seven parts considers Jesus Christ in the Bible. Rather than focusing solely on the New Testament, this section begins with discussion of the modes of God's self-communication to us and suggests that Christ's most original incarnation is in the language of the Hebrew Bible. The second section considers Patristics Christology. These essays explore the formation of the doctrines of the person of Christ and the atonement between the First Council of Nicaea in 325 and the eve of the Second Council of Nicaea. The next section looks at Medieval theology and tackles the development of the understanding of who Christ was and of his atoning work. The section on "Reformation and Christology" traces the path of the

Reformation from Luther to Bultmann. The fifth section tackles the new developments in thinking about Christ which have emerged in the modern and the postmodern eras, and the sixth section explains how beliefs about Jesus have affected music, poetry, and the arts. The final part concludes by locating Christology within systematic theology, asking how it relates to Christian belief as a whole. This comprehensive volume provides an invaluable resource and reference for scholars, students, and general readers interested in the study of Christology.

The Elgar Companion to Recent Economic Methodology J. B. Davis 2011-01-01 Economic methodology has traditionally been associated with logical positivism in the vein of Milton Friedman, Karl Popper, Imre Lakatos and Thomas Kuhn. However, the emergence and proliferation of new research programs in economics have stimulated many novel developments in economic methodology. This impressive Companion critically examines these advances in methodological thinking, particularly those that are associated with the new research programs which challenge standard economic methodology. Bringing together a collection of leading contributors to this new methodological thinking, the authors explain how it differs from the past and point towards

further concerns and future issues. The recent research programs explored include behavioral and experimental economics, neuroeconomics, new welfare theory, happiness and subjective well-being research, geographical economics, complexity and computational economics, agent-based modeling, evolutionary thinking, macroeconomics and Keynesianism after the crisis, and new thinking about the status of the economics profession and the role of the media in economics. This important compendium will prove invaluable for researchers and postgraduate students of economic methodology and the philosophy of economics.

Practitioners in the vanguard of new economic thinking will also find plenty of useful information in this path-breaking book.

Identity Development in the Lifecourse Mariann Märtsin 2019-11-21 This book offers a unique developmental perspective on identity construction in the context of mobility and transition to adulthood. Drawing upon semiotic cultural psychology, it embeds identity construction into the processes of meaning making; viewing identity as a field of hyper-generalised signs that are constantly reconstructed through encounters with social others in cultural worlds, and which allow individuals to make sense of themselves in relation to their lived pasts, experienced presents and imagined futures. Märtsin invites the reader to travel with eight young adults as they embark on their developmental journeys and seek to make sense of issues that matter most to them: home, adventure and belonging, friendships, recognition, and future-planning. The book is an invaluable resource for students and researchers interested in understanding the experiences of emerging adults in contemporary globalized world, but also for those interested in identity processes from a semiotic, cultural and developmental perspective.

Honor Among Christians David F. Watson David F. Watson

brings a new perspective to the "messianic secret," relying not on the Christological concerns of 19th- and 20th-century theologians, but on recent insights into the role of honor and shame in ancient Mediterranean culture on the part of social scientists. Mark's portrayal of Jesus simultaneously shows his ability to provide favors and benefits to others and his refusal to put himself forward or draw attention to himself as a benefactor, thereby teaching that in God's kingdom it is not the great and powerful who are most highly regarded, but the humble.

Peace Child Don Richardson 2005-08-08 From Cannibals to Christ-Followers--A True Story In 1962, Don and Carol Richardson risked their lives to share the gospel with the Sawi people of New Guinea. Peace Child tells their unforgettable story of living among these headhunters and cannibals, who valued treachery through fattening victims with friendship before the slaughter. God gave Don and Carol the key to the Sawi hearts via a redemptive analogy from their own mythology. The "peace child" became the secret to unlocking a value system that had existed through generations. This analogy became a stepping-stone by which the gospel came into the Sawi culture and started both a spiritual and a social revolution from within. With an epilogue updating how the gospel has impacted the Sawi people, this missionary classic will inspire a new generation of readers who need to hear this remarkable story and the lessons it teaches us about communicating Christ in a meaningful way to those around us.

A World of Indigenous Languages Teresa L. McCarty 2019-03-13 Spanning Indigenous settings in Africa, the Americas, Aotearoa/New Zealand, Australia, Central Asia and the Nordic countries, this book examines the multifaceted language reclamation work underway by Indigenous peoples throughout the world. Exploring political, historical, ideological, and pedagogical issues, the book foregrounds the decolonizing aims of contemporary Indigenous language movements inside and outside of schools. Many authors explore language reclamation in their

own communities. Together, the authors call for expanded discourses on language planning and policy that embrace Indigenous ways of knowing and forefront grassroots language reclamation efforts as a force for Indigenous sovereignty, social justice, and self-determination. This volume will be of interest to scholars, educators and students in applied linguistics, Ethnic/Indigenous Studies, education, second language acquisition, and comparative-international education, and to a broader audience of language educators, revitalizers and policymakers.

Karl Rahner, Culture and Evangelization Anthony Mellor 2019-05-15 In Karl Rahner, Culture and Evangelization, Anthony Mellor outlines a process of contemporary evangelisation which seeks to develop modes of public "mystagogical conversation" by engaging the religious imagination and draw upon personal experiences of transcendence and religious sensibility.

Meaning, Life and Culture Helen Bromhead 2020-12-17 This book is dedicated to Anna Wierzbicka, one of the most influential and innovative linguists of her generation. Her work spans a number of disciplines, including anthropology, cultural psychology, cognitive science, philosophy and religious studies, as well as her home base of linguistics. She is best known for the Natural Semantic Metalanguage (NSM) approach to meaning—a versatile tool for exploring 'big questions' concerning the diversity and universals of people's experience in the world. In this volume, Anna Wierzbicka's former students, old and current colleagues, 'kindred spirits' and 'sparring partners' engage with her ideas and diverse body of work. These authors cover topics from the grammar of action verbs to cross-cultural pragmatics, and over 30 languages from around the world are represented. The chapters in Part 1 focus on the NSM approach and cover four themes: lexico-grammatical semantics, cultural keywords, semantics of nouns, and emotion. In Part 2, the contributors connect with a meaning-based approach from their own intellectual perspectives, including

syntax, anthropology, cognitive linguistics and sociolinguistics. The deep humanistic perspective, wide-ranging themes and interdisciplinary nature of Wierzbicka's research are reflected in the contributions. The common thread running through all chapters is the primacy of meaning to the understanding of language and culture.

Emotions in Crosslinguistic Perspective Jean Harkins 2001-01-01

This volume aims to enrich the current interdisciplinary theoretical discussion of human emotions by presenting studies based on extensive linguistic data from a wide range of languages of the world. Each language-specific study gives detailed semantic descriptions of the meanings of culturally salient emotion words and expressions, offering fascinating insights into people's emotional lives in diverse cultures including Amharic, Chinese, German, Japanese, Lao, Malay, Mbula, Polish and Russian. The book is unique in its emphasis on empirical language data, analyzed in a framework free of ethnocentrism and not dependent upon English emotion terms, but relying instead on independently established conceptual universals. Students of languages and cultures, psychology and cognition will find this volume a rich resource of description and analysis of emotional meanings in cultural context.

Corpus Linguistics, Context and Culture Viola Wiegand 2019-11-18
Corpus Linguistics, Context and Culture demonstrates the potential of corpus linguistic methods for investigating language patterns across a range of contexts. Organised in three sections, the chapters range from detailed case studies on lexico-

grammatical patterns to fundamental discussions of meaning as part of the 'discourse, contexts and cultures' theme. The final part on 'learner contexts' specifically emphasises the need for mixed-method approaches and the consideration of pedagogical implications for real world contexts. Beyond its contribution to current debates in the field, this edited volume indicates new directions in cross-disciplinary work.

An Introduction to the Social and Political Philosophy of Bertolt Brecht Anthony Squiers 2014

Studies in Ethnopragmatics, Cultural Semantics, and Intercultural Communication Kerry Mullan 2019-10-24 This book is the first in a

three-volume set that celebrates the career and achievements of Cliff Goddard, a pioneer of the Natural Semantic Metalanguage approach in linguistics. In addition, it explores ethnopragmatics and conversational humour, with a further focus on semantic analysis more broadly. Often considered the most fully developed, comprehensive and practical approach to cross-linguistic and cross-cultural semantics, Natural Semantic Metalanguage is based on evidence that there is a small core of basic, universal meanings (semantic primes) that can be expressed in all languages. It has been used for linguistic and cultural analysis in such diverse fields as semantics, cross-cultural communication, language teaching, humour studies and applied linguistics, and has reached far beyond the boundaries of linguistics into ethnopsychology, anthropology, history, political science, the medical humanities and ethics.

Cultural Keywords in Discourse Carsten Levisen 2017-10-15

Cultural keywords are words around which whole discourses are organised. They are culturally revealing, difficult to translate and semantically diverse. They capture how speakers have paid attention to the worlds they live in and embody socially recognised ways of thinking and feeling. The book contributes to a global turn in cultural keyword studies by exploring keywords from discourse communities in Australia, Brazil, Hong Kong, Japan, Melanesia, Mexico and Scandinavia. Providing new case studies, the volume showcases the diversity of ways in which cultural logics form and shape discourse. The Natural Semantic Metalanguage (NSM) approach is used as a unifying framework for the studies. This approach offers an attractive methodology for doing explorative discourse analysis on emic and culturally-sensitive grounds. *Cultural Keywords in Discourse* will be of interest to researchers and students of semantics, pragmatics, cultural discourse studies, linguistic ethnography and intercultural communication.

Cognitive Exploration of Language and Linguistics René Dirven 2004-06-30 *Cognitive Exploration of Language and*

Linguistics is designed as a comprehensive introductory text for first and second-year university students of language and linguistics. It provides a chapter on each of the more established areas in linguistics such as lexicology, morphology, syntax, phonetics and phonology, historical linguistics, and language typology and on some of the newer areas such as cross-cultural semantics, pragmatics, text linguistics and contrastive linguistics. In each of these areas language is explored as part of a cognitive system comprising perception, emotion, categorisation, abstraction processes, and reasoning. All these cognitive abilities may interact with language and be influenced by language. Thus the study of language in a sense becomes the study of the way we express and exchange ideas and thoughts. This Second Revised Edition is corrected, updated and expanded. *Cognitive Exploration of Language and Linguistics* is clearly presented and organized after having been tested in several courses in various countries. Includes exercises (solutions to be found on the Internet).

Semantic Primes and Universal Grammar Bert Peeters 2006-01-01

This volume is part of a research program which started with the publication, in 1972, of Anna Wierzbicka's groundbreaking work on Semantic Primitives. The first within the program to focus on a number of typologically similar languages, it proposes a French, Spanish, Portuguese and Italian version of the Natural Semantic Metalanguage (NSM) elaborated over the years by Wierzbicka and colleagues. Repetition is avoided through teamwork: a number of authors working on the languages under examination have had equal input in a set of five papers dealing with distinct parts of the metalanguage. Some of the findings presented here invite us to have a fresh look at what has already been achieved, and to amend some of the working hypotheses of the NSM approach accordingly. The volume also contains six case studies (on Italian *sfogarsi*, Portuguese *saudades*, Spanish *crisis*, French *certes*, Spanish expressions of sincerity and Italian and Spanish diminutives, respectively).
