Local Government and Strategic Choice (Routledge Revivals) John Friend 2013-10-14 First published in 1969, this book is concerned with the processes of policy-making in local government. The authors address themselves to the basic challenge of planning in a democracy and consider issues such as how those elected to exercise choice on our behalf can preserve and expand their capacity to choose discriminatingly, when the sheer complexity of the issues facing them tends all the time to make them increasingly dependent on the skills and judgements of their professional advisers. This question is explored in relation to the many different, yet interdependent, aspects of the planning process which impinge on any local community – with particular reference to the planning of housing, transport, education, and shopping, of land use and local government finance. The book is the outcome of a four-year program of research during which a mixed team of operational research and social scientists was given a unique opportunity to observe the ways in which decisions were made and plans formulated in one

particular city- Coventry. It covers both political and professional aspects of local government in 1960s Great Britain and has had important implications for urban governments throughout the world.

IT-Based Management: Challenges and Solutions Joia, Luiz Antonio 2002-07-01 The main scope of this book is to show how IT has created a mandate to management to develop new business models and frameworks based on the important role of IT. The chapters within **IT-Based Management: Challenges and Solutions** tackle the role and impact of IT on strategy and resulting new models to be used in this context. In addition, the book proposes new models based on the pervasive role IT exercises in the current business arena.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. **Communities in Action: Pathways to Health Equity** seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Local Government and Strategic Choice J.K. Friend 2016-08-03 Local Government and Strategic Choice, Second Edition is the result of a study of policy-formation in the City Council of Coventry during a four-year period. This edition is a reappraisal of the earlier edition, with an emphasis on "connective planning." Part I describes the planning strategies made in an urban setting. This part explains the City and the City Council, organization of the local authority, decision-making mechanisms, developmental planning including land use, school system planning, and cross-departmental planning. Part II is a study of city planning as a process of strategic choice that has been altered in many different ways depending on the purpose. This part also discusses the problems encountered in the planning process such as the existence of organization boundaries in the government sector. Part III deals with a fictional case that relates the uncertainties and political realities of decision-making in an urban setting. The case studies cover land allocation and development, tax, and traffic issues. Part IV discusses organizational challenge and also touches in some way on the future organizational structure of local governments. This text then explains the need for "connective planning" of how individuals build flexible networks among decision-making agencies to serve the various interests of both the private and government sectors. This book is suitable for sociologists, city administrators and officials, local government officials, heads of government agencies, and heads of planning and engineering departments of local government units.

Food and Society Mark Gibson 2020-02-23 Food and Society provides a broad spectrum of information to help readers understand how the food industry has evolved from the 20th century to present. It includes information anyone would need to prepare for the future of the food industry, including discussions on the drivers that have, and may, affect food supplies. From a historical perspective, readers will learn about past and present challenges in food trends, nutrition, genetically modified organisms, food security, organic foods, and more. The book offers different perspectives on solutions that have worked in the past, while also helping to anticipate future outcomes in the food supply. Professionals in the food industry, including food scientists, food engineers, nutritionists and agriculturalists will find the information comprehensive and interesting. In addition, the book could even be used as the basis for the development of course materials for educators who need to prepare students entering the food industry. Accounting for Sustainability: Asia Pacific Perspectives Ki-Hoon Lee 2018-01-30 This book advances the understanding of corporate sustainability and challenges and roles of sustainability accounting in the Asia-Pacific region. The Asia-Pacific region has shown fast economic growth for several decades which is expected to continue. In this context, Asia has become the “production engine” of the global economy. At the same time scientific reports reveal that some planetary boundaries are crossed, for example relating to biodiversity and climate change. Companies in the Asia-Pacific region are therefore increasingly challenged to reduce their environmental impacts, to document their social contribution and to contribute to sustainable development. Key approaches to identify sustainability problems and challenges, to support improvement processes and to back up sustainability contributions include accounting and reporting. In contrast to the high relevance of accounting and reporting for corporate sustainability for the Asia-Pacific region, academic research has so far been dominated by Western researchers and pre-dominantly dealt with Western and Japanese cases and approaches. It is thus time to take account of Asian perspectives on accounting and reporting for sustainability in the Asia-Pacific region.

Financial Accounting with International Financial Reporting Standards Jerry J. Weygandt 2018-07-18 While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of *Financial Accounting: IFRS* highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt *Financial Accounting* have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.
