*Free-Choice Learning and the Environment* John H. Falk 2009-05-16  
Most environmental learning takes place outside of the formal education system, but our understanding of how this learning actually occurs is in its infancy. By surfing the internet, watching nature documentaries, and visiting parks, forests, marine sanctuaries, and zoos, people make active choices to learn about various aspects of their environment every day. Free-Choice Learning and the Environment explores the theoretical foundations of free-choice environmental education, the practical implications for applying theory to the education of learners of all ages, and the policy implications for creating new and sustainable environmental education opportunities.

**Fire Safety for Very Tall Buildings**  
International Code Council 2021-10-30  
This Guide provides information on special topics that affect the fire safety performance of very tall buildings, their occupants and first responders during a fire. This Guide addresses these topics as part of the overall building design process using performance-based fire protection engineering concepts as described in the SFPE Engineering Guide to Performance Based Fire Protection. This Guide is not intended to be a

recommended practice or a document that is suitable for adoption as a code. The Guide pertains to "super tall," "very tall" and "tall" buildings. Throughout this Guide, all such buildings are called "very tall buildings." These buildings are characterized by heights that impose fire protection challenges; they require special attention beyond the protection features typically provided by traditional fire protection methods. This Guide does not establish a definition of buildings that fall within the scope of this document.

Spider Woman Lady Hale 2021-10-07

Lady Hale is an inspirational figure admired for her historic achievements and for the causes she has championed. Spider Woman is her story. As 'a little girl from a little school in a little village in North Yorkshire', she only went into the law because her headteacher told her she wasn't clever enough to study history. She became the most senior judge in the country but it was an unconventional path to the top. How does a self-professed 'girly swot' get ahead in a profession dominated by men? Was it a surprise that the perspectives of women and other disadvantaged groups had been overlooked, or that children's interests were marginalised? A lifelong smasher of glass-ceilings, who took as her motto 'women are equal to everything', her landmark rulings in areas including domestic violence, divorce, mental health and equality were her attempt to correct that. As President of the Supreme Court, Lady Hale won global attention in finding the 2019 prorogation of Parliament to be unlawful. Yet that dramatic moment was merely the pinnacle of a career throughout which she was hailed as a pioneering reformer. Wise, warm and inspiring, Spider Woman shows how the law shapes our world and supports us in crisis. It is the story of how Lady Hale found that she could overcome the odds, which shows that anyone from similar beginnings will find that they can cope too.

The SPARC Architecture Manual David L. Weaver 1994 SPARC (Scalable Processor Architecture) is the industry's only openly defined and evolved RISC architecture. Version 9 is the new 64-bit incarnation of SPARC - the most significant change since SPARC's introduction in 1987! Unlike other RISC (Reduced Instruction Set Computer) designs, SPARC specifies not a hardware implementation ("chip"), but an open, standard architecture belonging to the community of SPARC vendors and users. The SPARC specification is defined by the SPARC Architecture Committee, a technical arm of the computer-maker consortium, SPARC International. Version 9 provides 64-bit data and addressing, support for fault tolerance, fast context switching, support for advanced compiler optimizations, efficient design for Superscalar processors, and a clean structure for modern operating systems. The V9 architecture supplements, rather than replaces, the 32-bit Version 8 architecture. The non-privileged features of Version 9 are upward-compatible from Version 8, so 32-bit application software can execute natively, without modification, on Version 9 systems - no special "compatibility mode" is required. Publication of the Version 9

architecture marks a three-year development effort by SPARC International member companies from a broad cross-section of disciplines.

Evaluation of the Computer Fire Model DETACT-QS Society for Fire Protection Engineers 2022-01-01 □ This engineering practice Guide, based on the DETACT-QS program, describes a model for predicting the response time of ceiling-mounted heat detectors/sprinklers and smoke detectors, installed under large unobstructed ceilings, for fires with user-defined, time-dependent heat release rate curves. The Guide provides information on the technical features, theoretical basis, assumptions, limitations, and sensitivities as well as guidance on the use of DETACT-QS. Evaluation is based on comparing predictions from DETACT-QS with results from full-scale fire experiments conducted in compartments with ceiling heights ranging from 2.44 m (8 ft) to 12.2 m (40 ft) and peak fire heat release rates ranging from 150 kW to 3.8 MW. Use of this model with building geometries or fire characteristics other than those used in this evaluation may require further evaluation or testing.

*Power of a Woman* Robert Frupp 2007-03-15 Description: The feminine spirit soars in *Power of a Woman* as Eleanor of Aquitaine, toughest of medieval women, relates her memoirs: of caring and loyalties, triumphs and trials; of her marriages to two warring kings, Louis VII of France, then Henry II of England. She speaks intimately, emotionally of her "too many quarreling sons," including Richard the Lionheart and John, of Magna Carta fame. A patron of troubadours, Eleanor commissions poetry as propaganda. She regales her readers with intrigues, crusades and tales of ruthless diplomacy against barons, kings, popes and Thomas Becket, while confessing her loves, her hopes for her many children, and their fates. In midlife her sense of community leads her to set up her Court of Ladies to balance male-

dominated worlds of Church and state. Her mission: to empower women with the Grace she enjoyed as the femme fatale of her day. Eleanor's "power of a woman" lets her pluck triumph from her defeats as well as her victories. Reviews: "Those of you who know me know that for me to give a work of historical fiction a high rating, it has to offer something extraordinary. This Robert Fripp has done in Power of a Woman. In this highly unusual fictional autobiography, Mr. Fripp tells Eleanor of Aquitaine's story "in her own words," as if she is dictating to a young lady in her household. Power of a Woman: review by Melissa Snell, Your Guide to Medieval History at About.com, which posts her full review at: [http://historymedren.about.com/od/ewho/fr/fripp\\_eleanor.htm](http://historymedren.about.com/od/ewho/fr/fripp_eleanor.htm) -Melissa Snell, Your Guide to Medieval History at About.com "Finally! Power of a Woman brings us an "autobiography" of Eleanor of Aquitaine that is accessible and entertaining. Telling her story in Eleanor's voice, Robert Fripp brings us medieval Europe through her eyes. At eighty-one, she hasn't much time. We feel her urgency, the chill in her bones. Impeccable research and storytelling combine to make this a "must" for all who want to know more about this fascinating woman. Her definition of love survives to this day! What a great read. This is so gripping. I got so totally caught up in this story one night that I woke up with images of Eleanor in my mind, and Kate Hepburn's voice in my ear. I love this tale." -Veronica Prior, Round Rock, TX "Power of a Woman is gripping in its wealth of detail. It makes me feel like I am in the midst

of the action. Of all books I have read, this is the only one that makes me experience what it must have felt like to have lived through those troublesome, exciting times. Such a wonderful, exciting book!" -Lady Shirley Cassidy, Dublin, Ireland  
Author Bio: British-born Robert Fripp gained a medieval outlook from five years on a choral scholarship in the choir of Salisbury Cathedral, the model for Lord of the Flies. He went on to study earth sciences before producing current affairs television for CBC in Toronto. He also: created IBM Visions magazine about high-performance computing; worked for Japan's public broadcaster; and wrote a book with great reviews, Let There Be Life, about cosmic and organic origins. Power of a Woman tells the memoirs of Eleanor of Aquitaine. Robert Fripp is hard to typecast; RobertFripp.ca may help.
