Networking the International System Madeleine Herren 2014-06-13 The book critically investigates the local impact of international organizations beyond a Western rationale and aims to overcome Eurocentric patterns of analysis. Considering Asian and Western examples, the contributions originate from different disciplines and study areas and discuss a global approach, which has been a blind spot in scholarly research on international organizations until now. Using the 1930s as a historical reference, the contributions question role of international organizations during conflicts, war and crises, gaining insights into their function as peacekeeping forces in the 21st century. While chapter one discusses the historicity of international organizations and the availability of sources, the

second chapter deliberates on Eurocentrism and science policy, considering the converging of newly created epistemic communities and old diplomatic elites. Chapter 3 sheds light on international organizations as platforms, expanding the field of research from the diversity of organizations to the patterns of global governance. The final chapter turns to the question of how international organizations invented and introduced new fields of action, pointing to the antithetic role of standardization, the preservation of cultural heritage and the difficulties in reaching a non-Western approach.

The Human Rights Breakthrough of the 1970s Sara Lorenzini 2021-12-16 During the 1970s human rights took the front stage in international relations; fuelling political debates, social activism and a

reconceptualising of both East-West and North-South relations. Nowhere was the debate on human rights more intense than in Western Europe, where human rights discourses intertwined the Cold War and the European Convention on Human Rights, the legacies of European empires, and the construction of national welfare systems. Over time, the European Community (EC) began incorporating human rights into its international activity, with the ambitious political will to prove that the Community was a global "civilian power." This book brings together the growing scholarship on human rights during the 1970s, the history of European integration and the study of Western European supranational cooperation. Examining the role of human rights in EC activities in Latin America, Africa, the Mediterranean, Eastern Europe and the Soviet Union, *The Human Rights Breakthrough of the 1970s* seeks to verify whether a specifically European approach to human rights existed, and asks whether there was a distinctive 'European voice' in the human rights surge of the 1970s.

Constraints on the Waging of War Frits Kalshoven 2011-07-21 This fully revised fourth edition of *Constraints on the Waging of War* considers the development of the principal rules of international humanitarian law from their origins to the present day. Of particular focus are the rules governing weapons and the legal instruments through which respect for the law

can be enforced. Combining theory and actual practice, this book appeals to specialists as well as to students turning to the subject for the first time.

Voltaire in Exile Ian Davidson 2016-04-14 In 1753, Voltaire - playwright, poet, philosopher, and one of the most feted figures in Europe - was forced into exile by King Louis XV, where he would remain for the last 25 years of his life. This period heralded a startling new beginning for this remarkable character during which Voltaire became a successful entrepreneur and wrote his masterpiece *Candide*. Cast out by the establishment, he also developed astonishingly modern ideas about human rights, borne out in his campaigns against a series of miscarriages of justice. Ian Davidson has drawn on the rich correspondence between Voltaire and his family, members of the Court at Versailles and the French intellectual elite, to paint a wonderful portrait of the man declared by Diderot to be 'the unique man of the century'.

Fascist Italy and the League of Nations, 1922-1935

Elisabetta Tollardo 2016-10-27 This book analyses the relationship between Fascist Italy and the League of Nations in the interwar years. By uncovering the traces of those Italians working in the organization, this volume investigates Fascist Italy's membership of the League, and explores the dynamics between nationalism and internationalism in Geneva. The relationship between Fascist Italy and the League of Nations was contradictory, shifting from active collaboration to open disagreement. Previous literature has not reflected this oscillation in policy, focusing disproportionately on the problems Italy caused for the League, such as the Ethiopian crisis. Yet Fascist Italy remained in the

League for more than fifteen years, and was the third largest power within the institution. How did a Fascist dictatorship fit into an organization espousing principles of liberal internationalism? By using archival sources from four countries, Elisabetta Tollardo shows that Fascist Italy was much more concerned with, and involved in, the League than currently believed.

Voltaire Ian Davidson 2010-12-09 We think of Voltaire as the epitome of the Enlightenment; in his own time he was

also the most famous and controversial figure in Europe. Davidson tells the whole, rich story of his life (1694-1778) - his early imprisonment in the Bastille; exile in England and his mastery of English; an obsession with money, of which he made a huge amount; a scandalous love life; his infatuation with Frederick the Great; a long exile on the borders of Switzerland; his passion for watch-making; his human rights campaigns and his triumphant return to Paris to die there as celebrity extraordinaire. Throughout all of this Voltaire's life was always informed by two things: a belief in the essential value of toleration in the face of fanaticism; and in the right of every man to think and say what he liked. It is rare to have such a vivid portrait of a great man.

The Material Subject Urmila Mohan 2020-11-01 The Material Subject emphasises how bodily and material cultures combine to make and transform subjects dynamically. The book is based on the French Matière à Penser (MaP) school of thought, which draws upon the ideas of Mauss, Schilder, Foucault and Bourdieu, among others, to enhance the anthropological study of embodiment, practices, techniques, materiality and power. Through theoretical sophistication and empirical field research, case studies from Europe, Africa and Asia bring MaP's ideas into dialogue with other strands

of material culture studies in the English-speaking world. These studies mediate different scales of engagement through a sensori-motor, affective and cognitive focus on practices of making and doing. Examples range from the precarity of professional divers in French public works to the gendered subjectivity of female carpet weavers in Morocco, from the ways Swiss watchmakers transmit craft knowledge to how Hindu devotees in India make efficacious use of altars, and from the enskilment of Paiwan indigenous people in Taiwan to the prestige of women's wild silk wrappers in Burkina Faso. The chapters are organised according to domains of practice, defined as 'matter of' work and technology, heritage, politics, religion and knowledge. Scholars and students with an interest in material culture will gain valuable access to global research,

rooted in a specific intellectual tradition.
