Merchants of Doubt Naomi Oreskes 2011-10-03 The U.S. scientific community has long led the world in research on such areas as public health, environmental science, and issues affecting quality of life. These scientists have produced landmark studies on the dangers of DDT, tobacco smoke, acid rain, and global warming. But at the

same time, a small yet potent subset of this community leads the world in vehement denial of these dangers. Merchants of Doubt tells the story of how a loose-knit group of high-level scientists and scientific advisers, with deep connections in politics and industry, ran effective campaigns to mislead the public and deny well-established scientific knowledge over four decades. Remarkably, the same individuals surface repeatedly—some of the same figures who have claimed that the science of global warming is "not settled" denied the truth of studies linking smoking to lung cancer, coal smoke to acid rain, and CFCs to the ozone hole. "Doubt is our product," wrote one tobacco executive. These "experts" supplied it. Naomi Oreskes and Erik M. Conway, historians of science, roll back the rug on this dark corner of the American scientific community, showing how ideology and corporate interests, aided by a too-

compliant media, have skewed public understanding of some of the most pressing issues of our era.

Corrupt Cities 2000 Much of the devastation caused by the recent earthquake in Turkey was the result of widespread corruption between the construction industry and government officials. Corruption is part of everyday public life and we tend to take it for granted. However, preventing corruption helps to raise city revenues, improve service delivery, stimulate public confidence and participation, and win elections. This book is designed to help citizens and public officials diagnose, investigate and prevent various kinds of corrupt and illicit behaviour. It focuses on systematic corruption rather than the free-lance activity of a few law-

breakers, and emphasises practical preventive measures rather than purely punitive or moralistic campaigns.

'The poorer and more oppressed people are, the weaker they become - until they just refuse to take it any more. Then they will rise up, and the gods help their oppressors.' wanted to rebuild his crime empire and look after his people. But the sinister Queen's Men had different ideas and whether he likes it or not, he's now a spy as well. Now, half the city of Ellinburg lies in ashes and the webs of political intrigue are stretching out from the Queen's capital to pull Tomas in. Dansburg is calling. In Dansburg the nobility fight with words, not blades, but the results are every bit as bloody. Freckles Gene Stratton-Porter 2020-04-07 One of the most beloved characters of the early-twentieth-century from the American naturalist and bestselling author of A Girl of the Limberlost. Raised in a Chicago orphanage and missing one hand, Freckles has survived a harsh childhood. When he becomes a security guard for a timber company in Indiana's Limberlost swamp, he comes to embrace the beauty of the wilderness and the many animals he encounters on his daily rounds, finally finding his place in the world and the courage to open his heart. "There's a love story, villains, adventure, close brushes with death, and absolute redemption at the end—and Freckles learns the secret of his paternity, which given the romantic conventions of books such as these, is absolutely glorious." —Buckeye Muse

Loon Jack McLean 2009-05-19 "Kids like me didn't go to

Vietnam," writes Jack McLean in his compulsively readable memoir. Raised in suburban New Jersey, he attended the Phillips Academy in Andover, MA, but decided to put college on hold. After graduation in the spring of 1966, faced with the mandatory military draft, he enlisted in the United States Marine Corps for a two-year stint. "Vietnam at the time was a country, and not yet a war," he writes. It didn't remain that way for long. A year later, after boot camp at Parris Island, South Carolina, and stateside duty in Barstow, California, the Vietnam War was reaching its peak. McLean, like most available Marines, was retrained at Camp Pendleton, California, and sent to Vietnam as a grunt to serve in an infantry company in the northernmost reaches of South Vietnam. McLean's story climaxes with the horrific three-day Battle for Landing Zone Loon in June, 1968. Fought on a remote hill in the northwestern corner of South Vietnam, McLean bore witness to the horror of war and was forever changed. He returned home six weeks later to a country largely ambivalent to his service. Written with honesty and insight, Loon is a powerful coming-of-age portrait of a boy who bears witness to some of the most tumultuous events in our history, both in Vietnam and back home.

A River Runs Through It and Other Stories, Twenty-fifth Anniversary Edition Norman Maclean 2009-08-14 Just as Norman Maclean writes at the end of "A River Runs through It" that he is "haunted by waters," so have readers been haunted by his novella. A retired English professor who began writing fiction at the age of 70, Maclean produced what is now recognized as one of the classic American stories of the twentieth century. Originally published in 1976, *A River Runs through It and Other Stories* now celebrates its twenty-fifth anniversary, marked by this new edition that includes a foreword by Annie Proulx. Maclean grew up in the western Rocky Mountains in the first decades of the twentieth century. As a young man he worked many summers in logging camps and for the United States Forest Service. The two novellas and short story in this collection are based on his own experiences—the experiences of a young man who found that life was only a step from art in its structures and beauty. The beauty he found was in reality, and so he leaves a careful record of what it was like to work in the woods when it was still a world of horse and hand and foot, without power saws, "cats," or four-wheel drives. Populated with drunks, loggers, card sharks, and whores, and set in the small towns and surrounding trout streams and mountains of western

Montana, the stories concern themselves with the complexities of fly fishing, logging, fighting forest fires, playing cribbage, and being a husband, a son, and a father. By turns raunchy, poignant, caustic, and elegiac, these are superb tales which express, in Maclean's own words, "a little of the love I have for the earth as it goes by." A first offering from a 70-year-old writer, the basis of a top-grossing movie, and the first original fiction published by the University of Chicago Press, *A River Runs through It and Other Stories* has sold more than a million copies. As Proulx writes in her foreword to this new edition, "In 1990 Norman Maclean died in body, but for hundreds of thousands of readers he will live as long as fish swim and books are made."

The Perfect Neighborhood Liz Alterman 2022-07-12 Liz Alterman's engrossing novel is a thought-provoking read about the dark side of suburbia and the secrets of close-knit communities, perfect for fans of Joshilyn Jackson. When actress and model Allison Langley leaves her former rockstar husband, Christopher, in the middle of the night, it's all her Oak Hill neighbors can talk about. The gossip comes to an abrupt halt when five-year-old Billy Barnes goes missing on his walk home from kindergarten. Billy's mother, Rachel, blames herself for being at work and letting her only child walk alone. Cassidy, Billy's teenage babysitter, was also late to arrive on the afternoon he disappeared and blames herself for his disappearance. As the clock ticks down, police are unable to find any trace of Billy, forcing Rachel to ponder the enemies she's made in their well-off suburb. Could it be one of her neighbors who stole her son? Would they abduct Billy to hurt her? How easy would it be to take a child while the parents or nannies are distracted? When another child goes missing, the town is put under a microscope as the police try to get

to the bottom of the disappearances. Will they be able to find the two children, or will it be too late? What secrets lie at the heart of this tragedy, and how far will one go to keep those dangerous secrets buried?

Jimmy Reid W. W. J. Knox 2019 Described as the best MP Scotland never had, Jimmy Reid was undoubtedly of the most important figures of late twentieth-century Britain. Often at the forefront of the major turning points in the history of industrial relations and politics in Britain, Jimmy's story is an epic one; from a poverty-stricken background in Govan, Glasgow, he became a communist at a young age, leading a national strike of engineering apprentices while only twenty, before being thrown into the national limelight as the leading spokesperson for the Upper Clyde Shipbuilders Work-In in 1971-2. Disillusioned with communism he left the Party for Labour and the centre-left before leaving them disenchanted with New Labour to join the Scottish National Party. This enlightening book looks at Jimmy's political journey from Communism, to Labourism, and ultimately to Nationalism (a political life in three acts), which not only speaks of the complexities of left politics after 1945, but also illuminates our understanding of institutions and social change in post-war Britain by showing how they were understood and negotiated by one inspirational individual.

The Bedside Urban Voltaire Jack McLean 2013-08-21 Jack McLean - aka The Urban Voltaire - was one of the most original columnists in the Scottish press. In the 1980s and 1990s he became an institution with a loyal readership as well as a healthy number of opponents and critics. This is a compilation ebook edition of his columns from the Glasgow Herald and The Scotsman and are guaranteed to entertain, enrage and shock in equal

measure depending on your outlook. Very few subjects escaped McLean's distinctive penmanship over those two decades: education, sport, religion, food and women all find a place in the mix. His writing moves speedily from affectionate reverie in one paragraph to scathing wit the next leaving some readers laughing at one moment and setting with indignation the next. McLean is one of modern journalism's great stylists, a proponent of the written word and remains one of Glasgow's most recognisable icons. Above all he is still great company.

We Bled Together Dominic Price 2017-11-10 There is no crime in detecting and destroying in wartime the spy and informer...I have paid them back in their own coin. - Michael Collins
Michael Collins' development of a formidable intelligence network transformed, for the first time in history, the military fortunes of the Irish against the British. The Dublin Brigade of the IRA was pivotal to this defining strategy. In 1919, Collins formed members of the brigade into two Special Duties Units. They eventually joined to form his 'Squad' of assassins tasked with immobilising British intelligence. Eyewitness testimonies and war diaries lend immediacy and insight to this thrilling account of the daring espionage and killings carried out by both sides on Dublin's streets. Dominic Price reveals how the IRA developed Improvised Explosive Devices, and experimented with chemical weapons in the form of poison gas and infecting water supplies. When the Civil War erupted, the devotion of a significant cohort of the Dublin Brigade to Collins, forged during the darkest of days, was unbreakable. Many of them, identified here for the first time, formed the backbone of the Free State in key intelligence and military roles. While not shying away

from the revulsions of the Civil War, neither does Price abandon the brigade's story at its conclusion. As well as revealing the disenchantment of some, who took part in the 1924 army mutiny, he exposes the personal horrors that awaited in peacetime, when psychological trauma was common. This is the stirring and poignant story of the human endeavour and suffering at the core of the Dublin Brigade's fight for Irish freedom.

The Center Cannot Hold Elyn R. Saks 2007-08-14 A much-praised memoir of living and surviving mental illness as well as "a stereotype-shattering look at a tenacious woman whose brain is her best friend and her worst enemy" (Time). Elyn R. Saks is an esteemed professor, lawyer, and psychiatrist and is the Orrin B. Evans Professor of Law, Psychology, Psychiatry, and the Behavioral Sciences at the University of Southern California Law School, yet she has suffered from schizophrenia for most of her life, and still has ongoing major episodes of the illness. *The Center Cannot Hold* is the eloquent, moving story of Elyn's life, from the first time that she heard voices speaking to her as a young teenager, to attempted suicides in college, through learning to live on her own as an adult in an often terrifying world. Saks discusses frankly the paranoia, the inability to tell imaginary fears from real ones, the voices in her head telling her to kill herself (and to harm others), as well as the incredibly difficult obstacles she overcame to become a highly respected professional. This beautifully written memoir is destined to become a classic in its genre.

He courses through politics, education, literary days, sex and drugs and playing the blues.

Scots at School Northcroft David Northcroft 2019-08-06 What is the defining Scottish experience? The Kirk, Scots Law, Hampden Park? There are several contenders, but school is the universal and enduring one. Stories and myths have clustered around its chief features: *Pupils as lads o' pairts.* Teachers as dominies.* The democratic intellect.* The village skweel.* Hard work, getting on and the power of the tawse.* Academic excellence and 'sticking in'. Telling the tale of Scotland's educational experience over the past 250 years, this book draws on the first-hand testimony of pupils, teachers and parents - with extracts taken

from biography, local history, journal and oral interview, along with fascinating contemporary photographs. The anthologised material is accompanied by David Northcroft's narrative outlining the history of the distinctive Scottish school system. By drawing out key themes of identity, nationalism and 'democracy', he sets the claims that have traditionally been made for the system's excellence and independent spirit against the accounts of people's actual experiences. This history, enhanced by the personal stories of those involved, offers the reader a vivid account of the experience of Scottish schooling. Key Features: *Strong 'nostalgia' market for books of this kind. *Draws on broad range of personal testimony. *Includes extracts from Tom Devine, John Galt, Hugh Miller, Magnus Magnusson, Neil Munro, Alan Spence and T. C. Smout. *Each section is prefaced with an editorial introduction - taken together, they trace the Scottish educational experience over the past 250 years.

Nightmare Envy and Other Stories George Blaustein 2018-02 Up until the end of World War II, academe in central Europe showed little interest in American culture. However, this rapidly changed as American culture became an increasingly inescapable part of everyday life in the postwar period. Drawing on a series of transatlantic encounters in the years following 1945, George Blaustein chronicles how issues like race, gender, and empire, as they relate to the United States, became areas of intense interest among members of the European academy. A major part of Blaustein's book revolves around the exchange of ideas that took place at the Salzburg Seminar in American Studies, founded in 1947. Through the period of occupation, the seminar hosted a who's-who of American and European intellectual life: figures like F. O. Matthiessen, Margaret Mead, Alfred Kazin, Saul Bellow, Ralph Ellison, Alain Locke,

and John Hope Franklin. In four concise chapters, *Nightmare Envy and Other Stories* explores how the ruin of postwar Europe led writers and intellectuals on both sides of the Atlantic to understand America in new ways. *Nightmare Envy and Other Stories* will interest scholars in the fields of American Studies, postwar intellectual history, and cultural diplomacy.

Hopeless But Not Serious Jack McLean 2013-08-21 In the early 1950s Sir Winston Churchill met the Irish politician Sean Lemass, who was later to become Taoiseach. The great statesman remarked upon the economic circumstances of Britain at the time. 'The situation in Great Britain,' quoth Churchill in his most grandiloquent tones, 'is serious but not hopeless.' Lemass responded instantly, 'Sure,' he said, 'it's exactly the opposite in Ireland.' Thus the title for Jack McLean's autobiography. It is a book about being born into the new world after the Second World War. McLean's varied experiences during a time which shifted from the residue of pre-war attitudes to a change in global culture are chronicled, as are his relationships with a large number of the students who are now household names. McLean is suitably scathing about most of them. Equally so is his account of the next step in his career - the turbulent area of education. He entered this a skilled politico and left a skilled sceptic. His final retirement from both education and politics was welcomed by all, not least himself. In this book we learn about what there was in his life and background to make him into one of the most polemical journalists to emerge in the post-war years 'No great task considering what there is really' said McLean when confronted with that observation. 'I only write what I've done, or didn't do at that.' Friend or foe notwithstanding, this book is about the times in which McLean has so far lived, along with lots of you out there. He says it's fairly true as well. Or at least honest.

Emotional Choices Robin Markwica 2018-03-09 Why do states often refuse to yield to military threats from a more powerful actor, such as the United States? Why do

they frequently prefer war to compliance? International Relations scholars generally employ the rational choice logic of consequences or the constructivist logic of appropriateness to explain this puzzling behavior. Max Weber, however, suggested a third logic of choice in his magnum opus *Economy and Society*: human decision making can also be motivated by emotions. Drawing on Weber and more recent scholarship in sociology and psychology, Robin Markwica introduces the logic of affect, or emotional choice theory, into the field of International Relations. The logic of affect posits that actors' behavior is shaped by the dynamic interplay among their norms, identities, and five key emotions: fear, anger,

hope, pride, and humiliation. Markwica puts forward a series of propositions that specify the affective conditions under which leaders are likely to accept or reject a coercer's demands. To infer emotions and to examine their influence on decision making, he develops a methodological strategy combining sentiment analysis and an interpretive form of process tracing. He then applies the logic of affect to Nikita Khrushchev's behavior during the Cuban missile crisis in 1962 and Saddam Hussein's decision making in the Gulf conflict in 1990-1 offering a novel explanation for why U.S. coercive diplomacy succeeded in one case but not in the other.
