Studying Peoples in the People's Democracies Mihály Sárkány 2005 Under socialism the anthropological sciences developed under conflicting pressures: on the one hand Soviet influences, Marxist ideology and institutional changes, on the other the continued influence of national traditions and of the distinction between *Volkskunde* and *Volkerkunde*. The chapters bring out striking differences between the countries considered: the German Democratic Republic, Poland, Czechoslovakia and Hungary. They also draw attention to variation within countries, and between sub-branches of the discipline. Coverage extends from the Stalinist years to the end of the socialist era, and the topics range from folklore studies at home to fieldwork expeditions abroad.

Ask Dr. Mueller Cookie Mueller 1997 *Ask Dr. Mueller* captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from *Walking Through Clear*

Water in a Pool Painted Black and other publications. Also the best of Cookie's art columns from *Details* magazine, and the funniest of her advice columns from the *East Village Eye*, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before *Bright Lights*, *Big City*, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

Her Tender Tyrant Elizabeth Lennox 2014-12-19 Marcus moved through life expecting everything to be logical. Science could explain everything and he'd learned to make enormous profits understanding science. So when he runs into the illogical Juliette, his mind has a hard time understanding why she would walk down the street singing and dancing. There wasn't any music! But no matter how much he craved logic and reason, his body craved Juliette more. Juliette is fascinated by Marcus's stoicism. How could he walk down the street and not feel the joy in the sunshine? How could he ignore the sounds of the grasshoppers and birds? Or smile at the perfection of a flower? And how could her mind and body need a man who didn't understand the joy of

living life for the moment? Enjoy the fifth book in The Alfieri Saga!

PCB Design for Real-World EMI Control

Bruce R. Archambeault 2013-06-29

Proper design of printed circuit boards can make the difference between a product passing emissions requirements during the first cycle or not. Traditional EMC design practices have been simply rule-based, that is, a list of rules-of-thumb are presented to the board designers to implement. When a particular rule-of-thumb is difficult to implement, it is often ignored. After the product is built, it will often fail emission requirements and various time consuming and costly add-ons are then required. Proper EMC design does not require advanced degrees from universities, nor does it require strenuous mathematics. It does require a basic understanding of the underlying principles of the potential causes of EMC emissions. With this basic understanding, circuit board designers can make trade-off decisions during the design phase to ensure optimum EMC design. Consideration of these potential sources will allow the design to pass the emissions requirements the first time in the test laboratory. A number of other books have been published on EMC. Most are general books on EMC and do not focus on printed circuit board design. This book is intended to help EMC engineers and design engineers understand the potential sources of emissions and how to reduce, control, or eliminate these sources. This book is intended to be a 'hands-on' book, that is, designers should be able to apply the concepts in this book directly to their designs in the real-world.

Making History in Iran Farzin Vejdani 2014-11-05 Iranian history was long told through a variety of stories and legend, tribal lore and genealogies, and tales of the prophets. But in the

late nineteenth century, new institutions emerged to produce and circulate a coherent history that fundamentally reshaped these fragmented narratives and dynastic storylines. Farzin Vejdani investigates this transformation to show how cultural institutions and a growing public-sphere affected history-writing, and how in turn this writing defined Iranian nationalism. Interactions between the state and a cross-section of Iranian society—scholars, schoolteachers, students, intellectuals, feminists, and poets—were crucial in shaping a new understanding of nation and history. This enlightening book draws on previously unexamined primary sources—including histories, school curricula, pedagogical materials, periodicals, and memoirs—to demonstrate how the social locations of historians writ broadly influenced their interpretations of the past. The relative autonomy of these historians had a direct bearing on whether history upheld the status quo or became an instrument for radical change, and the writing of history became central to debates on social and political reform, the role of women in society, and the criteria for citizenship and nationality. Ultimately, this book traces how contending visions of Iranian history were increasingly unified as a centralized Iranian state emerged in the early twentieth century.

Ancient Europe Stuart Piggott

2017-09-05 This book interprets the main lines of European prehistory from the first agricultural communities in the sixth or even seventh millennium B.C. until the incorporation of much of barbarian Europe within the Roman Empire. It traces the beginnings of animal domestication and plant cultivation in ancient Western Asia, and the transmission of these skills by movements of peoples or by assimilation, in the European continent. The early technology of working in copper, and later in bronze, is discussed. Metal winning and working, and trade in raw materials and finished products, brought social and political repercussions to barbarian and civilised peoples alike. The spread of the Indo-European languages is considered in its archaeological context, as is the formation of the Celtic peoples, soon to acquire iron technology and to become the main barbarian component in Europe, side-by-side with the civilised Mediterranean societies, Greek, Etruscan or Roman. The later Celtic world of Europe and the British Isles is examined, and an attempt made to estimate the contribution of the older barbarian world to the Europe, which emerged from the ruins of the Roman Empire, geographically, the book ranges over the whole European field, from the Atlantic shores to the Urals and the Caucasus. While it does not pretend to be a prehistory of Europe within the period chosen, the book does bring together and

discuss for the first time much scattered and often little-known archaeological evidence. This book is organized in a manner that will permit it being read on two levels. For the general non-specialist reader, the text and illustrations should give a sufficient idea of the nature of the theme and of the evidence, and of the development of the barbarian cultures side-by-side with the civilizations of antiquity, as their precursors and their subsequent counterparts. For the archaeological student however the text is documented with rather full references and notes at the end of each chapter

The Grain Market in the Roman Empire

Paul Erdkamp 2005-11-03 This book explores the economic, social and political forces that shaped the grain market in the Roman Empire. Examining studies on food supply and the grain market in pre-industrial Europe, it addresses questions of productivity, division of labour, market relations and market integration. The social and political aspects of the Roman grain market are also considered. Dr Erdkamp illustrates how entitlement to food in Roman society was dependent on relations with the emperor, his representatives and the landowning aristocracy, and local rulers controlling the towns and hinterlands. He assesses the response of the Roman authorities to weaknesses in the grain market and looks at the implications of the failure of local harvests. By examining the subject from a contemporary perspective, this book will appeal not only to historians of ancient economies, but to all concerned with the economy of grain markets, a subject which still resonates today.

Hitler's Plans for Global Domination

Jochen Thies 2012 "It is high time

that this extremely important, well researched, and soundly argued book on the real goals of Adolf Hitler be made accessible to the English-speaking public. At a time when one can still see foolish assertions about his wanting to revise the 1919 peace settlement, it will be especially useful for Americans to read about his concept of world domination and plans to implement it." . Gerhard Weinberg, University of North Carolina, Chapel Hill What did Hitler really want to achieve: world domination. In the early twenties, Hitler was working on this plan and from 1933 on, was working to make it a reality. During 1940 and 1941, he believed he was close to winning the war. This book not only examines Nazi imperial architecture, armament and plans to regain colonies but also reveals what Hitler said in moments of truth. The author presents many new sources and information, including Hitler's little known intention to attack New York City with long-range bombers in the days of Pearl Harbor."

The Structure of German Anthony Fox 2005-06-30 The new edition of The Structure of German has been fully revised to take account of developments in the subject. The author describes German phonology, morphology, syntax, semantics, and pragmatics. He introduces linguistic theory in order to throw light on every aspect of the language, providing students with a linguistically informed and accessible approach to the description of the language. Updated guides to further reading are given at the end of each chapter, and the book's usefulness for students and teachers has been enhanced by the addition of exercises and discussion questions. This is an ideal introduction to German linguistics. It may also be used as an introduction to linguistics for students of German.

The Diplomats, 1939-1979 Gordon A. Craig 2019-01-15 This volume offers a unique perspective on a turbulent and dangerous age by focusing on the activities and accomplishments of its diplomats. Its twenty-three interconnected essays discuss the politics of ambassadors, foreign ministers, and heads of state from Acheson and Adenauer to Sadat and Gromyko, as well as the special problems of the professionals in the foreign offices and the role of the media in modern diplomacy. Among its contributors are such distinguished international scholars as Akira Iriye, Michael Brecher, Stanley Hoffmann, W.W. Rostow, and Norman Stone. Expanding the field of inquiry covered by its acclaimed predecessor, *The Diplomats, 1919-1939*, which concentrated on Europe and the coming

of the Second World War, these essays showcase the major diplomatic practitioners of the period against the broader background of the problems and crises that confronted them—among others, the Polish question at the end of World War II, the onset of the Cold War, the defeat of EDC in 1954, the Suez crisis, Kruschchev's Berlin note in 1958, the Middle East War of 1967 and the oil shock of 1973, the Iranian revolution, and the Soviet invasion of Afghanistan. This account of the pendular swing from crisis and detente and back again is given a global perspective by careful treatment of the diplomacy of new nations like India, Communist China, and Israel, and the transformation of the Middle East and Japan. Among the new perspectives offered here are Geoffrey Warner's critical view of Ernest Bevin's attitude toward the United States, John Lewis Gaddis's judgment of Henry Kissinger's detente policy, W.W. Rostow's analysis of the diplomatic method of Paul Monnet, Rena Fonseca's assessment of Nehru's policy of nonalignment, Shu Guang Zhang's fresh look at the relationship between Zhou Enlai and Mao, and Paul Gordon Lauren's critique of U.N. crisis management from Trygve Lie to Perez de Cuellar. Highly original also are Steven Miner's portrait of Molotov, Michael Brecher's pioneering study of the diplomacy of Abba Eben, and James McAdams's analysis of German Ostpolitik. Originally published in 1994. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press.
